The Reference Standards for NDT Industry

Angle Beam Calibration Blocks (ASME)

ASME Angle Beam Calibration Blocks contain (4) EDM notches
Axial and Circumferential on both OD and ID at a depth of 8-11% of nominal wall thickness x
1/4" max wide (most notches are approximately 0.020-0.030" wide) x 1.000" min long.
Blocks 4" NPS and smaller are left at 360°, while blocks over 4" are milled to an 8"
arc section. All blocks are 8" in axial length, or 8T, whichever is greater.
Made in accordance with ASME Section V Article 4 Figure T-434.3.
Material: Carbon Steel & Stainless Steel.
