The Product from India

The Reference Standards for NDT Industry

API RP 2X Reference Standards

Level "C" examination recommended practice 2X (RP 2X). Ultrasonic examination of offshore structural fabrication and guidelines for qualifications of ultrasonic technicians.

Geometry:

Set of 4 blocks required.

One block containing a square notch and one each with V-notches for 45°, 60° and 70° orientations, for establishing scanning sensitivity for root reflectors. Simulated references for rejectable flaws established by the Operator's UT specialist, should be added to this block for the calibration of internal reflectors.

Material: Available in different grade materials.
