

MPT Copper Pad & Copper Pad Assembly

NDE TECH

The Product from India

The Reference Standards for NDT Industry

Copper Pad

Copper Pads are used to prevent arc burn by helping to maintain proper electrical contact between test parts and contact heads.

Dimensions: 5" X 7"

Copper Pad Assembly (2 Copper Pads & V-Block) Double-Braided Pad with V-Block. Heavy copper braid provides contact over greater surface area. Built with neoprene, the V-block base centers and supports test parts. The pad can be reversed to provide two wear faces. Fits all units except A-915 and the smaller MAG Series units.

Material: Copper
