

MPT Large Copper Pad & Large Copper Pad Assembly

NDE TECH

The Product from India

The Reference Standards for NDT Industry

Large Copper Pad

Large Copper Pads are used to prevent arc burn by helping to maintain proper electrical contact between test parts and contact heads.

Dimensions: 5" X 10"

Large Copper Pad Assembly (2 Copper Pads & V-Block) Double-Braided Pad with V-Block. Heavy copper braid provides contact over greater surface area. Built with neoprene, the V-block base centers and supports test parts. The pad can be reversed to provide two wear faces. Replaces standard pads with no modifications needed.

Dimension: 12" X 12"

Material: Copper
