

MFL Eddy Current Tube Standard Block

NDE TECH

The Product from India

The Reference Standards for NDT Industry

Magnetic Flux Leakage Tube

Ready to request a quote for a standard?

Here's what we need...

What is the material? (Alloy, OD and Wall)

Is NDE supplying the material or will it be customer supplied?

What defects are needed and what size? (most depths are given in % of tube wall)

Is there a specification the standard needs to comply with? (ASME, etc.)

If you have a drawing, or even a simple hand sketch, please send that along as well.

We specialize in custom eddy current tubes, and have years of experience in machining a huge range of defects. From TWHs and FBHs, OD and ID grooves, milled flats, and OD and ID thinning bands, to ID FBHs, ID contoured flats, 120°/180° wear scars, tapered flaws, and tube-to-tube wear,
