The Product from India

The Reference Standards for NDT Industry

PAUT IIW ISO 19675 Calibration Block

PAUT IIW ISO 19675 Calibration Block

The PAUT IIW Block, made in accordance with ISO 19675 was designed by an international committee of NDT experts with the express purpose of creating a globally accepted, standardized block for Phased Array Ultrasonic calibrations. Before the development of this spec, there were no international standards describing a specific block for calibrating PAUT systems.

Geometry: 25mm wide x 100mm tall x 300mm long, with 100mm and 50mm radii

Material: Available in different grade materials.
